ECO FRIENDLY SHOWERHEAD

with ShowerStart Technology

The Luxurious Way To Save Water & Energy

ECO FRIENDLY SHOWERHEAD

ShowerStart is Earth friendly. Our patented technology saves the considerable amount of water that is typically wasted as the user waits for the shower to reach a comfortable temperature. The result is a significant reduction in water consumption as well as a meaningful reduction in energy costs.

We call it "Satisfying Sustainability".

Features:

- Eliminates wasting water during shower warm up
- Pressure compensating flow regulation
- 3 year warranty

How ShowerStart Technology works:

- Automatically reduces flow to a trickle once water reaches 95°F (35°C)
- Normal flow is resumed by pulling lanyard or toggling bypass lever
- Automatically resets for next use after water flow to showerhead is terminated
- Designed for use in environments with water pressure of 20 psi or higher

Eco Valve

Catalog Number:
E-100C

- Solid Brass Valve
- 1/2" NPT Fittings
- Detachable 12" (30.5 cm) lanyard
- 5.9 oz / .17 kg

Eco Valve with Showerhead

Catalog Number:
E-250C

- Solid brass valve and fittings
- Plated ABS body
- 1/2" NPT fittings (female)
- Single function, full-body spray pattern
- 54 rub-clean, anti-clog spray nozzles
- 9.5 oz / .27 kg
